Reimagining Masculinity

PARENT SESSION

with DANIEL PRINCIPE
Youth Advocate & Educator

Please join us for a one-hour presentation with Daniel Principe, a trained health professional, youth advocate and educator.

This is also an open invite to families and friends outside of the College community who are interested in this topic.

Reimagining Masculinity - With a passion for helping young men reimagine masculinity and embody a vision of manhood defined by virtue, Daniel works with schools and communities to challenge porn culture and the sexualisation of women and girls.

Championing boys in a digital world, Daniel is determined to address the elephant in the room and for us all to be part of creating the positive cultural change we all hope for by inviting us to have the difficult conversations.

Young people need our help to sensitively unpack the messages they receive about stereotypes, relationships and sexuality.

Daniel's goal is to create spaces for authentic conversations around the challenging topics youth face in their daily lives: consent, social media, stereotypes, relationships.
